CE Quiz for NEARI Webinar

Growing Beyond: An Introduction to Adolescent Girls with Sexually Abusive Behavior

Webinar Date: 9/11/18

Attendees: Please circle the appropriate response:

1. Aggressive behavior is gendered and it is, therefore, important to understand the differences between males and females who have sexually abused.	True or False
2. Research has not found significant differences in terms of the sexual histories of males and females who have sexually abused.	True or False
3. When girls offend with others, social amplification occurs in a way that is not consistent with boys who offend in groups.	True or False
4. Although people believe in the victim to victimizer dynamic, this is not salient with girls who sexually abuse.	True or False
5. Girls tend to sexually abuse due to issues related to power and control.	True or False
6. A girl who is predisposed to offend may have callous and unemotional traits and attachment deficits.	True or False
7. The treatment process of girls who sexually offend is nearly identical to their male counterparts.	True or False
8. The offending behavior of girls is often relational; it may be a strategy to engage others close to them and it could also be a form of revenge.	True or False
9. Most girls who have sexually offended have previously been diagnosed with Conduct Disorder and Oppositional Defiant Disorder.	True or False
10. The assessment process is the same for girls and boys who have sexually offended.	True or False
